Choose the correct answer from the options given below

- A. $a > b > c > e > d$
- B. $c > a > b > d > e$
- C. $c > e > b > d > a$
- D. $d > c > a > b > e$

ANS: B

Read the given passage and answer the following questions.

Despite the fact that social security programmes in India are not responses to structural adjustment but have a long history of their own. Social expenditure in India is nevertheless particularly vulnerable to budget cuts. The social sector is a major spending area of the government, comprising poverty reduction interventions, health, education, nutrition, social assistance and social welfare. Most departments of government are in some way responsible for spending under this broad head. The sector is highly divisible, thus facilitating incremental and piecemeal reductions in real expenditure. It has a weak political constituency, dominated by technical-expert persons, which the mass of evaluative research that has historically been critical of state interventionism has further weakened. Such work has been put to uses other than those originally intended - not to reform the sector but as justification to abolish major components of it entirely. However, since 1991, social sector expenditure has not declined as much as had been anticipated. Despite, or because of, its departmental pervasiveness, it is an extremely-perhaps uncuttable-low proportion of GNP: 2.4 per cent as compared with 6.5 per cent in Malaysia, 12.2 per cent in Botswana and 15-25 per cent in OECD countries. Even though social sector expenditure is also flawed by spatial patchiness, conflicting time trends in expenditure levels and composition and patterns specific to each component of welfare, cuts have been widely resisted and certain Indian states have increased their current debt in order to protect social expenditure. There is, fortunately, and necessarily, speculative literature predicting, sometimes with illustrations drawn from elsewhere, the likely outcomes of cuts in various types of social expenditure. But it is far too early for these to be evidence of the actual impact on social welfare is a long-term project of several decades.

46) The government spending on poverty reduction programmes suffers from

- A. Down-sized expenditure in real terms.
- B. High demand from prospective beneficiaries.
- C. Several social welfare programmes competing for funds.
- D. Too many divisible allocations

ANS: A

47) The expert evaluation reports are used to

- A. Justify banishing the social security system.
- B. Reform the social welfare sector.
- C. Strengthen the political constituency of social security.
- D. Support the government spending on social sector

ANS: A

48) The social sector in India is experiencing

- A. A vast amount of speculative literature.

- B. Change in composition and patterns of social welfare.
- C. Increased current debt account by certain states to protect their social security measures.
- D. Upward revision of budget allocations in a few specific areas

ANS: C

49) The gist of the passage is that

- A. In actuality, diversification funds to areas other than social welfare are justifiable.
- B. The social security system in India should be strengthened.
- C. The social welfare system must be abandoned.
- D. There is no evidence as to the utility of social welfare measures in India

ANS: B

50) Social security programmes in India encounter the issue of

- A. Direct implementation
- B. Increased government intervention
- C. Indirect implementation
- D. Structural rearrangement
